About the Mises Institute

OUR MISSION

The Ludwig von Mises Institute champions the economics of liberty in academics and in public life. We seek a radical shift in the intellectual climate to restore the free and enterprising society. In this cause, we defend the market economy, private property, and sound money, and oppose all forms of government intervention.

OUR WORK

Working with young people at more than 900 colleges and universities, and with our Members around the world, we offer student fellowships, teaching programs, conferences, books, and academic and popular periodicals. All combine to advance the theory and practice of freedom, the key to prosperity and civilization, and to show that statism causes poverty and social chaos.

OUR HISTORY

Founded in 1982 and named for Ludwig von Mises, the economist of the century, the Mises Institute has inspired students, professors, writers, statesmen, and businessmen to commit themselves to the ideas and practice of liberty. As the standard-bearer of the Austrian School of economics, the Institute has enjoyed the support of such luminaries as Murray N. Rothbard, F.A. Hayek, and Henry Hazlitt.

MURRAY N. ROTHBARD

ISBN: 0-945466-26-9

Order No.: B268

These four volumes offer a complete history of the colonial period of American history, a period lost to students today, who are led to believe American history begins with the Constitution. They are a *tour de force*, enough to establish Rothbard as one of the great American historians.

A New Land, A New People: The American Colonies in the Seventeenth Century (531 pages, including index)

Volume II:

“Salutary Neglect”: The American Colonies in the First Half of the Eighteenth Century (294 pages, including index)

Volume III:

Advance to Revolution, from 1760–1775 (373 pages, including index)

Volume IV:

The Revolutionary War, 1775–1884 (470 pages, including index)

America's Great Depression

5th Edition

MURRAY N. ROTHBARD

410 pgs. (hardback) \$29.00

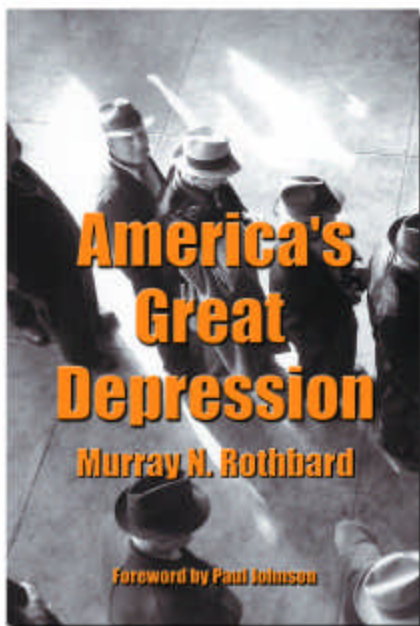

ISBN: 0945466-05-6

Order No.: B161

with an Introduction by

Paul Johnson

Applied Austrian economics doesn't get any better than this. *America's Great Depression* is a staple of modern economic literature and is crucial for understanding a pivotal event in American and world history.

Since it first appeared in 1963, it has been the definitive treatment of the causes of the depression. The book remains canonical today because the debate is still very alive.

Had the book appeared in the 1940s, it might have spared the world much grief. Even so, its appearance in 1963 meant that free-market advocates had their first full-scale treatment of this crucial subject.

The Mises Institute edition features a new introduction by historian Paul Johnson.

REASSESSING THE PRESIDENCY

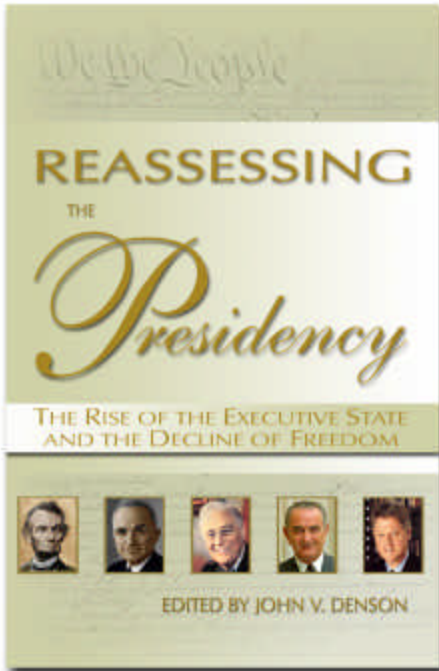

THE RISE OF THE EXECUTIVE STATE AND THE DECLINE OF FREEDOM

EDITED BY JOHN V. DENSON

832 pgs. (hardback) \$35.00

ISBN: 0-945466-29-3

Order No.: B284

This is the first full-scale revision of the U.S. presidency written from an Austrian-libertarian perspective. These original essays zero in on a much neglected reality that the executive department of the U.S. government has always been the sum total of the American welfare-warfare state (exactly as the antifederalists in the founding era predicted).

Whereas conventional histories tell a Whiggish story of ever-increasing progress, these essays observe that the presidents and their administrations, from George Washington to

Bill Clinton, have been responsible from the continual decline in liberty, particularly in their use of the war power.

This volume, in its incredible scope and attention to scholarly detail, undertakes a complete rethinking of political history. It is the story of how the U.S., step by step, abandoned its libertarian roots.

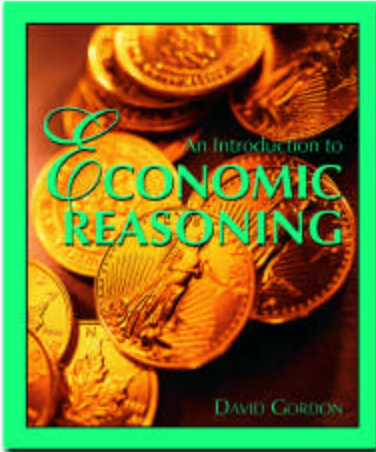

AN INTRODUCTION TO ECONOMIC REASONING

DAVID GORDON

193 pgs. (paperback) \$15.00

ISBN: 0-945466-28-5

Order No.: B269

The aim of this introductory text is to teach the intelligent young reader how to think about economic problems in a manner consistent with the Austrian School. Its chapters on action, preference, demand and supply, value theory, and price controls emphasize deductive logic, the market process, and the failures of government intervention.

THE IRREPRESSIBLE ROTHBARD

EDITED BY LLEWELLYN H. ROCKWELL, JR.

PREFACE BY JOANN ROTHBARD

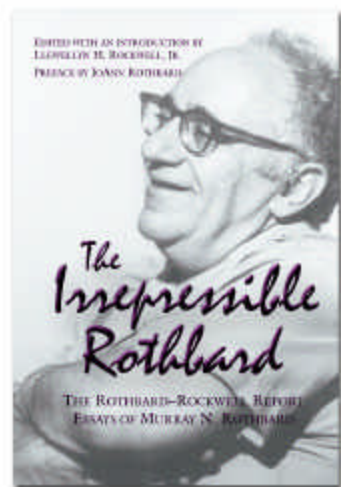

431 pgs. (hardback) \$29.00

ISBN: 1-883959-02-0

Order No.: B275

This volume highlights a decade of Rothbard's journalism, cultural criticism, and political observation.

The chapters combine libertarian economics, decentralist local patriotism, and a dissident cultural outlook that sees the growth of government as the key to the loss of the Old Republic. Together they show Rothbard's intellectual vigor and the optimism with which he embraced the task of challenging official opinion during the Clinton years.

EGALITARIANISM AS A REVOLT AGAINST NATURE AND OTHER ESSAYS

MURRAY N. ROTHBARD

352 pgs. (paperback) \$15.00

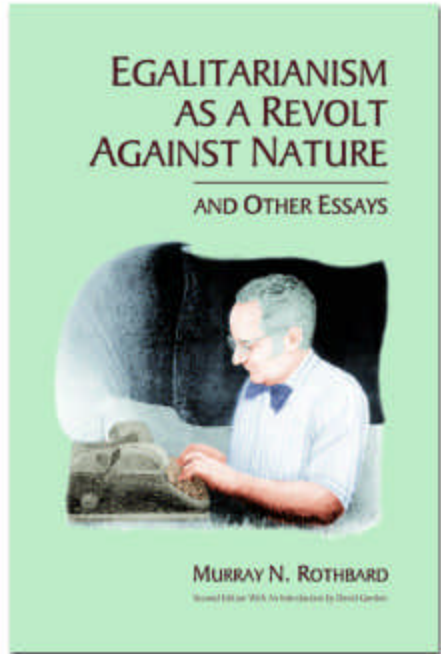

ISBN: 0-945466-23-4

Order No.: B278

Rothbard's treatise of applied libertarian political and economic theory fueled the current intellectual revolt against the centralized social and economic management of the welfare-warfare state.

He argues that egalitarian theory always results in a politics of statist control because it is founded on revolt against the ontological structure of reality itself, an attempt to replace what exists with a romantic image of an idealized primitive state of nature.

The implications of this are worked out on topics such as market economics, child rights, environmentalism, feminism, foreign policy, redistribution, and a host of other issues that are driving public debate today. The Mises Institute's edition is reset, and includes a new introduction by David Gordon, along with the original introduction by Roy A. Childs, Jr., as well as an additional essay not included in the original.

15 GREAT AUSTRIAN ECONOMISTS

EDITED BY RANDALL G. HOLCOMBE

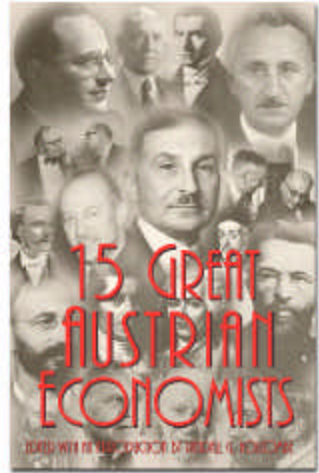

258 pgs. (paperback) \$16.00

ISBN: 0-945466-04-8

Order No.: B267

The Austrian tradition began formally with Carl Menger's 1871 *Principles of Economics*. This collection presents ideas from the full sweep of this intellectual history, highlighting fifteen thinkers who made the greatest contributions to advancing the Austrian School of economics.

These original essays are written by Austrians who explain the Austrian view of property, markets, prices, competition, entrepreneurship, business cycles, and government policy.

THE COSTS OF WAR

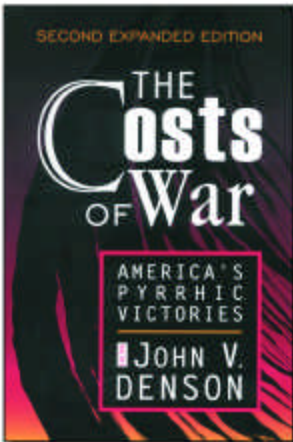

AMERICA'S PYRRHIC VICTORIES

EDITED BY JOHN V. DENSON

535 pgs. (paperback) \$35.00

ISBN: 0-7658-0487-5

Order No.: B242

Nothing is so dangerous to liberty as the power to make war, argues this remarkable collection of over twenty essays. There can be no reconciling freedom and empire. The second edition is expanded to include an essay on World War I by Ralph Raico and another by David Gordon on war

propaganda. Contributors include Allan Carlson, Paul Gottfried, Murray N. Rothbard, Joseph Stromberg, and Robert Higgs.

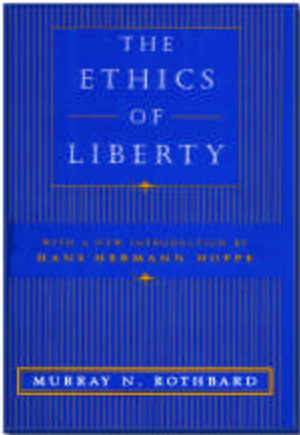

THE ETHICS OF LIBERTY

MURRAY N. ROTHBARD

357 pgs. (hardback) \$25.00

ISBN: 0-8147-7506-3

Order No.: B251

Murray Rothbard's greatest contribution to the politics of freedom is back in print. Foreign-language editions have appeared, but the English version was unavailable. But times have changed.

For believers in liberty, Rothbard is an invaluable intellectual asset. At last, his most rigorous argument is available again, and in the stirring prose for which he is famous.

DEMOCRACY—THE GOD THAT FAILED

THE ECONOMICS AND POLITICS OF MONARCHY, DEMOCRACY, AND NATURAL ORDER

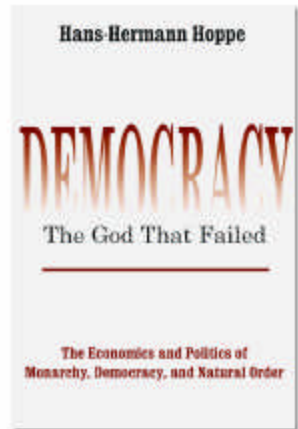

HANS-HERMANN HOPPE

328 pgs. (hardback) \$44.95

ISBN: 0-7658-0088-8

Order No.: B283

Hoppe tackles modern problems of government, economics, and society from a radical Austro-libertarian perspective. The book is centered on the theme that social democracy has failed us and that decentralized, non-state legal orders respecting property rights provide the only practical means of preserving liberty.

SECESSION, STATE & LIBERTY

EDITED BY DAVID GORDON

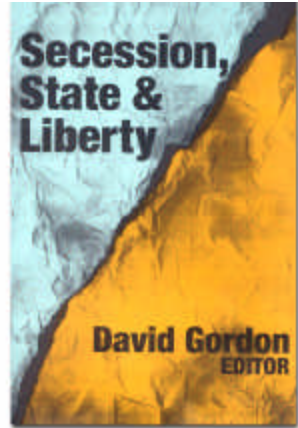

344 pgs. (hardback) \$50.00

ISBN: 1-56000-362-6

Order No.: B255

These essays argue that the political impulse to secede is a vital part of the Lockean classical-liberal tradition, one that emerges when national governments become too big and too ambitious.

These important essays argue that the threat of secession should be revived as a bulwark against government encroachment on individual liberty and private property rights, as a guarantor of international free trade, and as protection against attempts to curb the freedom of association.

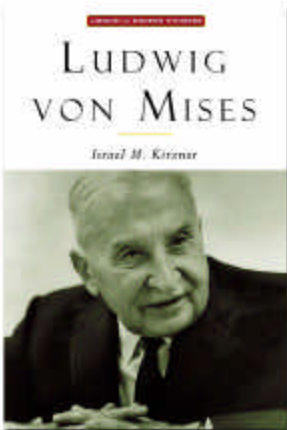

LUDWIG VON MISES

ISRAEL M. KIRZNER

220 pgs. (hardback) \$25.00

ISBN: 1-882926-61-7

Order No.: B282

Israel Kirzner has contributed widely to the modern Austrian literature. In this contribution, he broadens his focus to present a perspective on the entire Misesian legacy.

The exegesis is detailed, and the argument thorough—quite an accomplishment in a book of this length. An outstanding contribution to the core library of every Misesian.

SELECTED BY MARGIT VON MISES

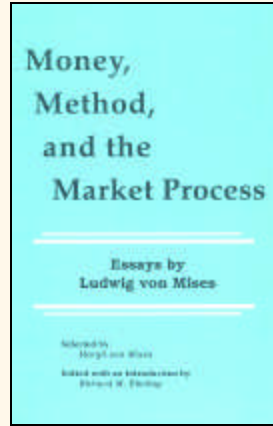

EDITED BY RICHARD EBELING

325 pgs. (paperback) \$20.00

ISBN: 0-945466-06-4

ISBN: 0-945466-19-6

Order No.: B290

This edited volume on the life, work, and legacy of Murray N. Rothbard will be the subject of scholarly discussion for decades to come. It's a moving tribute given by the economists, journalists, and friends who knew him, worked with him, and were inspired by his vision of an integrated science of human action and a purely private social order.

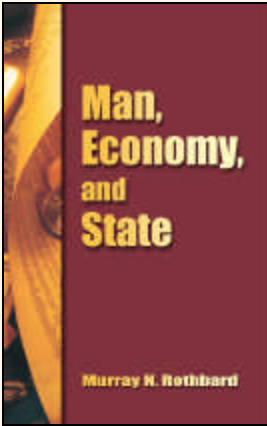

MAN, ECONOMY, AND STATE

MURRAY N. ROTHBARD

987 pgs. (paperback) \$35.00

ISBN: 0-945466-32-3

Order No.: B164

In this pillar of the Austrian School library and the last real treatise on economics, Rothbard takes Austrian thought even further in the areas of utility and welfare economics, antitrust, labor, taxation, public goods, and social insurance schemes. More than any book, *Man, Economy, and State* taught economics to the post-Mises generation.

HENRY HAZLITT: A GIANT OF LIBERTY

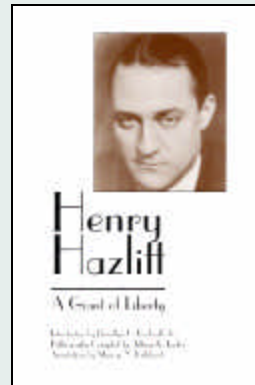

JEFFREY A. TUCKER

158 pgs. (paperback) \$15.00

ISBN: 0-945466-16-1

Order No.: B265

This bibliography contains more than 6,000 entries, with books annotated by Murray N. Rothbard, in a near-complete listing of articles by this Austrian journalist. It identifies for the first time unsigned editorials in the *New York Times* (1934–1946) which were actually written by Hazlitt, and reveals that he had a larger impact on our nation's intellectual life than anyone has yet realized.

THE LOGIC OF ACTION

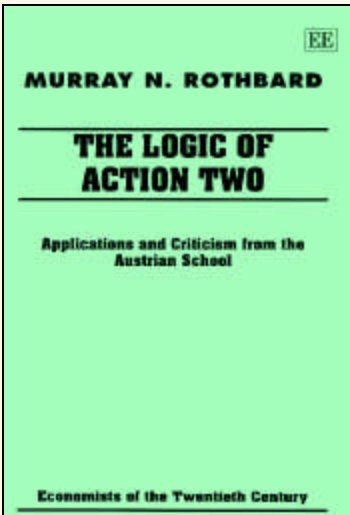

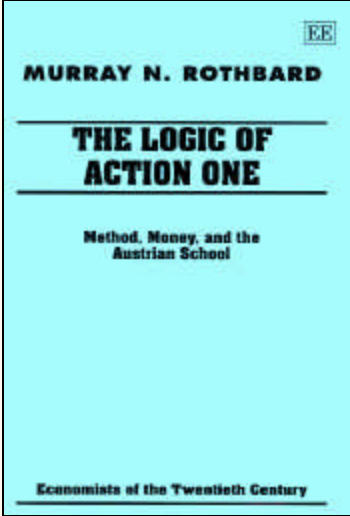

MURRAY N. ROTHBARD

Two volumes

868 pgs. (hardback) \$165.00

ISBN: 1-85898-570-6

Order No.: B243

This two-volume work, published in Edward Elgar's "Economists of the Twentieth Century" series, establishes Murray N. Rothbard's position as the leading Austrian School thinker after Mises.

In these essays, some new and some previously published, Rothbard argues that economics is a deductive science based on the fundamental realities of action, scarcity, and the passage of time. He engages some theoretical debates on topics such as property rights, justice, welfare, value, and efficiency.

The second volume contains "The Myth of Neutral Taxation," "Law, Property Rights, and Air Pollution," "The Fallacy of the 'Public Sector'," plus an unpublished review of Buchanan's and Tullock's *The Calculus of Consent*, and much more.

HISTORY OF ECONOMIC THOUGHT

MURRAY N. ROTHBARD

Two volumes

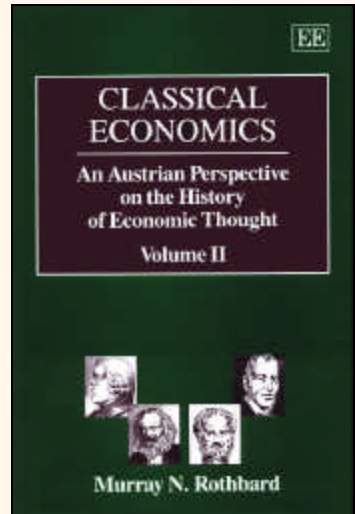

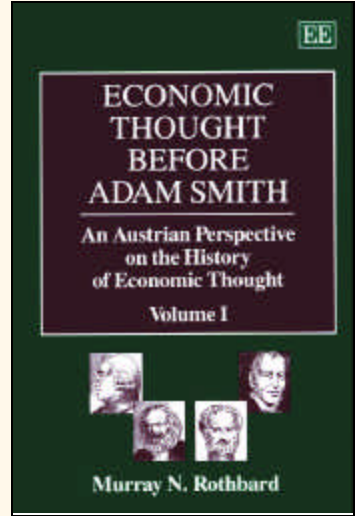

1075 pgs. (hardback) \$199.00

ISBN: 1-85278-962-X

Order No.: B300

Economists are accustomed to thinking of their discipline as a modern science. Rothbard proves them wrong. Long before he begins his discussion of more familiar 18th- and 19th-century theorists, he covers hundreds of thinkers the world over. This may prove to be the book's major and lasting contribution.

For Rothbard, the economic thought of the ancients, early Christians, and scholastics is surprisingly sophisticated. The implications of the Reformation are discussed, along with the proto-Austrian influence of the scholastic tradition, the high-water mark of economic thought before the marginal revolution. Rothbard views Adam Smith as having severed economics from its grounding in individual, purposeful human action.

CAPITAL & PRODUCTION

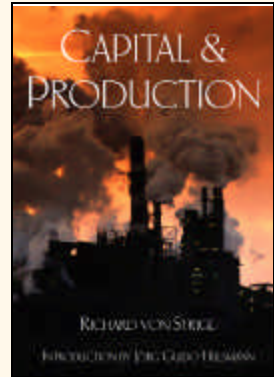

RICHARD VON STRIGL

208 pgs. (paperback) \$15.00

ISBN: 0-945466-31-5

Order No.: B281

Very few works on capital and the business cycle have been translated from the original German. Now a missing link in Austrian capital theory is brought to the English-speaking world for the first time. The book is the bridge that links Böhm-Bawerk's production theory and Mises's business cycle theory, and spells out the relationship between production and consumption in market settings.
